# COLLABORATION

## Is it worth it?

---

Carolyn Lott

Executive Director, YSS

# What is collaboration?

---

A partnership with organizations with which you are not immediately connected... collaborating to produce or make something together

# It takes time...

---

- First field session with USFS and stakeholders in 2010
- Fall of 2012, first meeting with facilitation
- 2014 collaborative became independent from USFS
- 2018 Master Stewardship Agreement finalized

# Design Process Elements Early

---

Take the time to develop a charter – purpose, organizational structure, governance, membership, etc.

## Other Tools

- Communication Protocol
- Membership Form
- Meeting Schedule
- Website
- Field Trips

# ADAPTABILITY

---

## Continue to revisit priorities

### Restoration

- 2011-2012 – Previously burned areas of the southern half of the forest.
- 2014 – Rim Fire salvage and recovery

+

### Watershed Health

- 2017-2018 – Establish underlying values, develop a large landscape plan, prioritize treatment areas, enter into a Master Stewardship Agreement as a vehicle to achieve goals

# MULTI-BENEFIT

The work of the collaborative must result in benefits for all stakeholders.

# THANK YOU!

---
